CAMPERVANS

**THE SIXTH GENERATION OF A DESIGN ICON**

BEAUTIFULLY CONVERTED BY VOLKSLEISURE

**Volkswagen believe you need to select a campervan that is right for the job and has multi usage, that way you'll get your money's worth. Not only does it have to perform well for holidays and recreational use but as an every day car. Taking the children/grandchildren to school and loading the garden rubbish ready for the tip, are all part of its multi tasking duties.**

The VW camper has been synonymous with the great outdoors as well as being the No1 choice for business transportation since its launch in the 1950's. At Volkswagen we never forget what makes VW campers and transporters great and why it has millions of fans worldwide. We have a lot to live up to we know, but that's why at Volkswagen all our campers are built by enthusiasts who have grown up with the brand and still personally own and use them today. In other words 'We Practice What We Preach'.

**Simply put – you'll love our conversions.**

Before we commence our magic on your campervan. We need to select the correct base vehicle that matches your exact needs. Volkswagen offers a wide variety of factory fitted optional extras, models & trim options that you might find at first a little daunting to select. Don't worry - we will guide you through the selection process to ensure you get the right specification for you. Our knowledge and experience of building campervans coupled with the reliability and robustness of Volkswagen - ensures that our campervans are built to last and retain their value in years to come.

**A True Thoroughbred**

# FIRST CLASS ACCOMMODATION

# FULL LENGTH SLIDING SEAT SYSTEM

## EXTRA LIVING SPACE HUGE REAR LOAD SPACE

You'll notice that many campervans only have either a fixed rear seat or one with a small adjustable slide. The problem here is that you can never use the campervan for transporting large items and loads using the rear door. You'll always have to use the side door. The solution is our Reimo rear sliding seat system that slides the full length of the camper meaning the 3 rear passengers can sit comfortably directly behind the driver if required when on a journey. This leaves a massive load area in the rear to carry everything you need, including bicycles safely and out of the way of the passenger. Then when you arrive at your destination – simply offload the gear and slide the seat to its fully rear position to give you a spacious living area.

Another benefit of the full sliding seat is that when eating as a family of 4, just simply slide the seat to its front position, swivel the driver & passenger seats round and you have the perfect social seating position for a meal for 4 or playing your favourite board game. A special feature we have designed is the under seat storage. This slides with the seat and has a front and rear hinged door allowing you to load long items such as ladders, skis or fishing rods straight through without having to lay the seats down.

Volksleisure's sliding seat system is a clear winner for numerous reasons and will transform your campervan making it more versatile in everyday use.

**We know you'll love it.**

## 5,6 OR 7 SEATER CAMPERVAN

We fit the Reimo Variotech 3000 seat & power rail system to all our campervans.

### Why?

It's simple, Reimo's variotech seat and power rail system has the ability to secure the rear seat in multiple locking positions.

### Flexibility

The seat can also be removed completely for those occasions when you wish your campervan was more van than camper! Additional single seats can be fitted to the sliding rail on LWB models. Making your campervan a full 7 seater.

### Safety

When it comes to safety there is no compromise and the Variotech seat leads the way where many other seats on the market today fall short! The seat has been through in-chassis testing and complies to the latest European standards. The variotech is one of the only seats on the market which offers 3 seats with integral 3-point belts.

Additional single rear seats can be easily attached to the rails

# GENEROUS SLEEPING FOR A FAMILY OF 4

For a great night's sleep, the rear seat quickly and easily converts into a surprisingly large double bed 1205mm x 2000mm for 2 adults. An optional roof bed gives an additional sleeping space, designed to give ample room for a further 2 adults or perfect for the children which means when they go to bed, you don't have to.

## EXTEND YOUR LIVING SPACE

**NO MORE DIRTY PAWS**  
REAR COLD WATER PRESSURE SHOWER

**NEVER RUN OUT OF GAS**  
6KG GAS CAPACITY

**EXTRA SHELTER**  
WIND OUT OR DRIVEAWAY AWNING

## SPECIFICATION & PRICE GUIDE 2018

**£27,495** inc VAT Short Wheel Base Fixed price

**£29,495** inc VAT Long Wheel Base Fixed price

Our prices are based on converting a new or used VW T5 or T6 transporter with front single swivel seats already fitted. If you are supplying your own T5 or T6 without these, an extra £550.00 inc VAT will be added to the price. This is for the swivel bases/hand brake lowering kit. Should any of the items listed in our conversion not be required then the price will be reduced accordingly.
