

CAMPERVANS

VW T6

TRIO HIGH *Style*

from the team at

THESE FAMOUS REIMO CAMPERVANS ARE BUILT IN THE UK BY OUR REIMO TRAINED & EXPERIENCED ENGINEERS IN OUR DEDICATED REIMO WORKSHOP AND CARRY THE ALL IMPORTANT REIMO BADGE AND BACK UP.

The team at Volksleisure and Westward Leisure have teamed up to build for you this VW T6 Reimo Trio High-Style which is the flagship of Campervans designed by Reimo.

Built using the latest technology and cutting edge machines, the Trio High-Style is a stunning yet practical Campervan using the latest VARIOTECH 3000 seat system which slides the full length of the Campervan.

As we are authorised Reimo agents, we can offer you the latest Reimo Campervan conversion with the full support and back up you would expect when purchasing this remarkable Campervan.

We build all our Reimo Campervans on a T30 chassis with VW factory fitted swivel seats. Complete with Highline specification and heated seats. We can build on a Transporter Van chassis and fit our own glass or we can build on a Combi Van with VW factory glass (this will be £1000 more for the Combi option) You have a choice of interior finishes but the popular colour tends to be white. All our Reimo Campervans are built to the highest standard, which will help retain it's value in years to come.

We try and keep the ordering process nice and simple. There are many additional options you can add to your base vehicle but we prefer to chat these through face to face to ensure the campervan specification is right for you. All our Reimo Campervans are built in our Reimo dedicated workshop in North Devon Workshop. We have customers all over the UK and our main showroom is based in Bradford, West Yorkshire. (However, we do always have a demo model to view in North Devon).

FULL LENGTH SLIDING SEAT SYSTEM

EXTRA LIVING SPACE HUGE REAR LOAD SPACE

You'll notice that many campervans only have either a fixed rear seat or one with a small adjustable slide. The problem here is that you can never use the campervan for transporting large items and loads using the rear door. You'll always have to use the side door. The solution is our Reimo rear sliding seat system that slides the full length of the camper meaning the 3 rear passengers can sit comfortably directly behind the driver if required when on a journey. This leaves a massive load area in the rear to carry everything you need, including bicycles safely and out of the way of the passenger. Then when you arrive at your destination – simply offload the gear and slide the seat to its fully rear position to give you a spacious living area.

Another benefit of the full sliding seat is that when eating as a family of 4, just simply slide the seat to its front position, swivel the driver & passenger seats round and you have the perfect social seating position for a meal for 4 or playing your favourite board game. A special feature we have designed is the under seat storage. This slides with the seat and has a front and rear hinged door allowing you to load long items such as ladders, skis or fishing rods straight through without having to lay the seats down.

The Variotech sliding seat system is a clear winner for numerous reasons and will transform your campervan making it more versatile in everyday use.

We know you'll love it.

5,6 OR 7 SEATER CAMPERVAN

We fit the Reimo Variotech 3000 seat & power rail system to all our campervans.

Reimo's variotech seat and power rail system has the ability to secure the rear seat in multiple locking positions.

Flexibility

The seat can also be removed completely for those occasions when you wish your campervan was more van than camper! Additional single seats can be fitted to the sliding rail on LWB models. Making your campervan a full 7 seater.

Safety

When it comes to safety there is no compromise and the Variotech seat leads the way where many other seats on the market today fall short! The seat has been through in-chassis testing and complies to the latest European standards. The variotech is one of the only seats on the market which offers 3 seats with integral 3-point belts.

Additional single rear seats can be easily attached to the rails

Fold Down Bed

Wardrobe

One of the key selling points of our version of the Trio High Style is the most great time and care in designing a lighting system which is exclusive to us atmosphere inside your campervan day or night.

2 Burner Hob & Sink

Rear USB Connection
