CAMPERVANS

**VOLKSWAGEN T7 & FORD TRANSIT**

BEAUTIFULLY CONVERTED BY VOLKSLEISURE

Volkswagen believe you need to select a campervan that is right for the job and has multi usage, that way you'll get your money's worth. Not only does it have to perform well for holidays and recreational use but as an every day car. Taking the children/grandchildren to school and loading the garden rubbish ready for the tip, are all part of its multi tasking duties.

The VW camper has been synonymous with the great outdoors as well as being the No1 choice for business transportation since its launch in the 1950's.

At Volkswagen we never forget what makes VW campers great and why it has millions of fans worldwide. We have a lot to live up to we know, but that's why at Volkswagen all our campers are built by a team who have grown up with the brand and still personally own and use them today. In other words 'We Practice What We Preach'.

Simply put – you'll love our conversions.

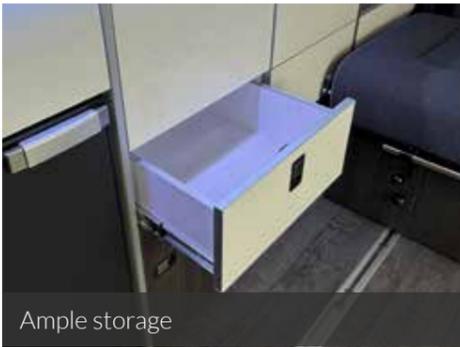

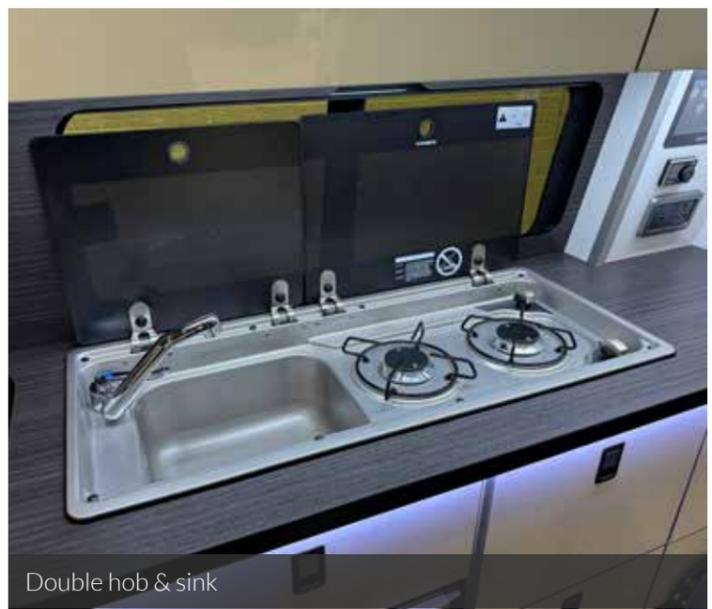

Our conversion is now available on both the VW T7 and now the New Ford Transit as both brands are built on the same chassis at the factory which means our award winning design can be applied to both vehicles.

We build the conversion with quality and safety at the core of everything we do and we adhere to British and European standards for the leisure industry.

All our new campervans carry 'Vehicle Type Approval' and are correctly registered with DVLA as Motor Caravans / M1.

# FIRST CLASS ACCOMMODATION

# FULL LENGTH SLIDING SEAT SYSTEM

## EXTRA LIVING SPACE, HUGE REAR LOAD SPACE

You'll notice that many campervans only have either a fixed rear seat or one with a small adjustable slide. The problem here is that you can never use the campervan for transporting large items and loads using the rear door. You'll always have to use the side door. The solution is our Reimo 3000 rear sliding seat system that slides the full length of the camper meaning the 3 rear passengers can sit comfortably directly behind the driver if required when on a journey. This leaves a massive load area in the rear to carry everything you need, including bicycles safely and out of the way of the passenger. Then when you arrive at your destination – simply offload the gear and slide the seat to its fully rear position to give you a spacious living area..

When it comes to safety there is no compromise and the Reimo Variotech seat leads the way where many other seats on the market today fall short! The seat has been through in-chassis testing and complies to the latest European standards.

The Reimo variotech is one of the few seats on the market which offers 3 seats with integral 3-point belts and ISO fix points.

Another benefit of the full sliding seat is that when eating as a family of 4, just simply slide the seat to its front position, swivel the driver & passenger seats round and you have the perfect social seating position for a meal for 4 or playing your favourite board game.

A special feature we have designed is the under seat storage. This slides with the seat and has a front and rear hinged door allowing you to load long items such as ladders, skis or fishing rods straight through without having to lay the seats down.

Volkswagen's sliding seat system is a clear winner for numerous reasons and will transform your campervan making it more versatile in everyday use.

**We know you'll love it.**

## WHY IS THE REIMO 3000 SLIDING SEAT SYSTEM SO VERSATILE?

It's simple, Reimo's Variotech 3000 sliding seat system has the ability to secure the rear seat in multiple locking positions to suit the needs of the passengers and driver.

The seat can also be removed completely for those occasions when you wish your campervan was more van than camper!

Additional single seats can also be fitted to the sliding rail should you the need arise for the extra passenger.

# GENEROUS SLEEPING FOR A FAMILY OF 4

For a great nights sleep, the rear seat quickly and easily converts into a surprisingly large double bed for 2 adults. The roof bed gives an additional sleeping space, designed to give ample room for a further 2 adults or perfect for the children which means when they go to bed, you don't have to.

Large double bed for 2 adults

Under seat storage with drop down doors front & rear

Roof bed with sprung base & comfortable mattress

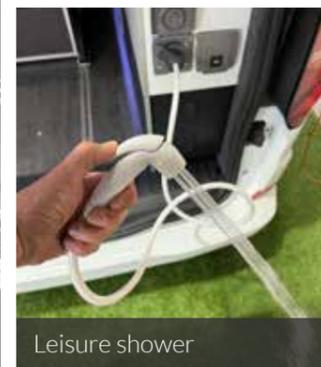

## EXTEND YOUR LIVING SPACE

Zip out panoramic roof canvas

Rear BBQ point

Leisure shower

Rear vented gas locker
